Dear Resident,

The Town of Watson Water Project is underway with an estimated completion date of September 2021.

The water pressure you may expect will be approximately 40 to 80 pounds per square inch (PSI). To insure the integrity of your plumbing, it may be advisable for you or a licensed plumber to inspect the system to insure it will handle a municipal water supply.

All plumbing after the connection from the Town of Watson's water supply is the owner's responsibility.

If you have questions please send emails to the following address:

waterclerk@townofwatsonny.com

Sincerely,

Town of Watson Board
